## Invisible Shield® PRO 15 Nano-Scale Glass Coating

Invisible Shield® PRO 15 nano-scale glass coating represents a major breakthrough in glass coating technology. It is a proprietary formula, ultra-hydrophobic glass coating that was developed after years of research to offer **unmatched glass protection, durability and performance.**

As a professional-grade, high performance, poly-siloxane, ultra-hydrophobic coating, **PRO 15 durably seals and protects interior and exterior glass against wear, corrosion and degradation from environmental exposure.** It was designed to be applied "in-line" by glass manufacturers and covalently bonds to flat glass, quickly and efficiently, to preserve and maintain the glass and prevent costly corrosion, degradation and damage.
